Who We Are and What We Do

The **EDGE** Group prides itself by staying up to date with the latest technology available in the Manufacturing IT industry. We provide our customers with off-the-shelf software and hardware integrated solutions which simplifies installation, maintenance, troubleshooting, and training. Microsoft® and Dell® are just a few standards we have incorporated with our systems design. However, we are flexible enough to integrate with corporate IT standards that may already exist. The **EDGE** can be a consultant, integrator, partner or educator to assist our customers with deploying the most efficient solutions to meet or exceed our customer’s data needs.

If you are interested in knowing more about what EDGE can offer you with a future in automation please contact us immediately to setup a date and time for a phone conversation and send us your resume at info@EdgeDataGroup.com.
