The EDGE Group prides itself by staying up to date with the latest technology available in the Manufacturing I.T. industry. We can provide you with off-the-shelf software and hardware integrated solutions which ease installation, maintenance, troubleshooting, and training. Microsoft® and Dell® are just a few standards we have incorporated with our systems design. However, we are flexible enough to integrate with your corporate I.T. standards that may already exist. The EDGE can be your consultant, integrator, partner or educator to assist your company with deploying the most efficient solutions for your data needs.
